

GOVIND GHOSH

Full Stack Developer & DevOps Engineer

+91 7906630435 | govindghosh0@gmail.com | Delhi NCR | [linkedin.com/in/govind-web-developer](https://www.linkedin.com/in/govind-web-developer) | github.com/Govindghosh

PROFESSIONAL SUMMARY

Full-stack developer with 3+ years designing, building, and owning production systems end-to-end. Specialised in MERN stack, FastAPI, and cloud infrastructure (AWS EC2, Docker, Nginx, CI/CD). Architected and shipped live platforms — event ticketing and P2P crypto exchange — with scalable backend design, real-time features, Redis caching, and optimised API performance. Comfortable driving projects from architecture decisions to deployment and post-launch monitoring.

WORK EXPERIENCE

Full Stack Developer

Subhx InfoTech (OPC) Pvt. Ltd. · Karnal, Haryana (Remote) · Apr 2026 – Present

- Designed and built scalable web applications across the full stack — React.js frontend to Node.js/Express APIs and MongoDB
- Owned cloud infrastructure setup, Docker containerisation, and CI/CD pipeline configuration from day one
- Collaborated directly with stakeholders to define architecture and sprint deliverables in an Agile environment

Full Stack Developer & DevOps Engineer

TunoTech OPC Pvt. Ltd. · Remote, India · Sep 2025 – Mar 2026

- Architected and shipped production MERN + FastAPI services across 3 environments (dev / staging / prod); owned full stack lifecycle from design through deployment
- Provisioned and hardened AWS EC2 instances with IAM roles, security groups, and CloudWatch alarms — maintained ~99.9% uptime
- Administered Vultr VPS Linux servers: OS setup, UFW firewall rules, user management, and log-based health monitoring
- Configured Nginx reverse proxy with SSL/TLS (Let's Encrypt) and Cloudflare DNS / CDN / proxying for all services
- Rebuilt GitHub Actions CI/CD pipelines, cutting average deployment time from ~20 min to ~4 min (80% reduction); containerised all apps with Docker + Compose
- Managed AWS S3 & Cloudflare R2 storage: presigned URLs, CORS policies, bucket permissions; set up AWS RDS with connection pooling and automated backups
- Built real-time features with Socket.io and async task queues via BullMQ + Redis; secured services with JWT, OAuth 2.0, Firebase Auth, and Helmet.js

Full Stack Developer

Add-God Makers Pvt. Ltd. · India · Sep 2024 – Aug 2025

- Led end-to-end development of an enterprise CRM/HRM platform (app.addgod.in) with role-based access control for admins, managers, and employees
- Designed MongoDB schemas with compound indexing and query optimisation; reduced key query response times by ~35% on high-volume collections
- Owned full cloud infra: Dockerised deployments on AWS EC2 and Vultr VPS with Nginx + SSL; Cloudflare DNS and CDN configuration
- Set up GitHub Actions CI/CD pipelines for automated builds and zero-downtime deployments across environments
- Mentored 2 junior developers through code reviews, sprint planning, and engineering best practices in an Agile workflow

Web Developer

Cybetiq Pvt. Ltd. · India · Aug 2023 – May 2024

- Built full-stack web applications using React.js, Node.js, Express.js, and MongoDB; implemented JWT auth with RBAC
- Reduced average API response latency by ~25% through query optimisation, strategic indexing, and response caching
- Deployed and managed applications on Render, Vercel, Netlify, and Cloudflare with GitHub Actions CI/CD for automated releases

KEY PROJECTS

Tikhat — Financial Rewards & Referral Platform

tikhat.in · partner.tikhat.in · React.js · FastAPI · MongoDB · AWS EC2 · Vultr · Nginx · Docker · GitHub Actions

- Architected and led end-to-end development of a multi-tier financial rewards platform handling product purchases, user earnings, and referral chains
- Built configurable earnings engine supporting multiple reward tiers (monthly return rates) with automated calculation and real-time user balance updates
- Designed multi-level referral tracking system with chain-based commission distribution (5% per referral level) and accurate ledger management
- Developed full-featured admin panel: manual reward percentage controls, user management, transaction oversight, and platform-wide configuration
- Integrated real-time support chat (Socket.io) for user-admin communication; built dedicated partner portal for sales and earnings tracking
- Owned full cloud infrastructure: AWS EC2 provisioning, Nginx + SSL/TLS, Docker containerisation, GitHub Actions CI/CD, and uptime monitoring

Cryptians.store — P2P Crypto Exchange

cryptians.store · Express.js v5 · Socket.io · BullMQ · Redis · AWS S3 · Cloudflare R2 · Docker · Vultr VPS

- Architected modular Express.js v5 backend with Helmet.js security headers, structured Winston logging, and layered error handling
- Implemented API debouncing and client-side caching strategies — reduced redundant server calls by ~40%
- Built real-time P2P trade chat with Socket.io and async notification queues via BullMQ + Redis
- Designed KYC onboarding flow: Twilio OTP + SendGrid email verification + admin approval pipeline; deployed on Docker + Vultr with full CI/CD

Add-God Makers — Enterprise CRM & HRM Platform

app.addgod.in · MERN · Firebase Auth · Role-Based Access · Real-time Dashboards

- Built multi-role enterprise platform with granular RBAC (admins, managers, employees) using Firebase Auth and custom middleware
- Modules: employee management, attendance tracking, leave requests, task assignment, and real-time reporting dashboards
- Designed database architecture for high-volume HR data with indexing strategies for sub-100ms query performance

TECHNICAL SKILLS

Languages	JavaScript (ES2022+), TypeScript, Python 3.x
Frontend	React.js (v18/v19), Next.js, Redux Toolkit, React Hook Form, Zod, Tailwind CSS v4, Vite
Backend	Node.js, Express.js v5, FastAPI, REST APIs, Socket.io, BullMQ, WebSockets
Database	MongoDB, Mongoose, Redis, PostgreSQL (Supabase), Firebase Firestore
Cloud / Infra	AWS (EC2, S3, RDS, IAM, CloudWatch, API Gateway), Vultr VPS, Cloudflare R2 & CDN
DevOps	Docker, GitHub Actions CI/CD, Nginx, SSL/TLS (Let's Encrypt), UFW, PM2, Linux Admin
Auth / Security	JWT, OAuth 2.0, Firebase Auth & Admin SDK, bcrypt, Helmet.js, CORS, express-rate-limit
Tools	Git, GitHub, Postman, VS Code, Twilio, SendGrid

EDUCATION

Bachelor of Electronic Commerce

Dr. Bhimrao Ambedkar University, Agra, Uttar Pradesh · 2018 – 2021
